

BABT R&TTE Conformity Assessment - Product List

TAC Manufacturer Model Name

This GSM list is a combined listing of GSM 900 / 1800 / 3G terminals where BABT has been involved in the conformity assessment procedure under either Annex IV (Technical Construction File or TCF procedure) or Annex V (Full Quality Assurance Approval or FQA Approval procedure) of the R&TTE Directive 1999/5/EC. It is not a complete list of terminals covered by BABT certification; it includes R&TTE Directive Annex IV or Annex V products where the certificate holder has agreed to their inclusion in this list.

To fully identify the products, the list includes the TAC part of the products' IMEI allocation.

For equipment types not included, please contact the manufacturer for confirmation of compliance with the R&TTE Directive.

The list includes both GSM terminal types placed on the market for the first time under the R&TTE Directive and GSM terminal types previously approved by BABT under the TTE Directive which have transferred into either the TCF or FQA conformity assessment procedures under the R&TTE Directive.

Manufacturers may apply for inclusion in the GSM list by applying for BABT certification under Annex IV or Annex V of the R&TTE Directive. Please see <http://www.babt.com/rtte-directive.asp> for details.
